

# FamilySearch Partner Products

Lise Embley

Director – Williamsburg Family History Center

## About FamilySearch Partners

“FamilySearch works with a variety of partners to help provide you with as many ways as possible to find your family members.”<sup>1</sup> Partners create products for Web, Windows, Mac and Mobile.

Products have differing levels of support for FamilySearch Family Tree:

Tree Share

**Read and write** Family Tree data to match, compare, and modify records including sources, discussions, change history, and community member interaction.

Tree Access

**Read only** to analyze, display, or print family history reports and charts.

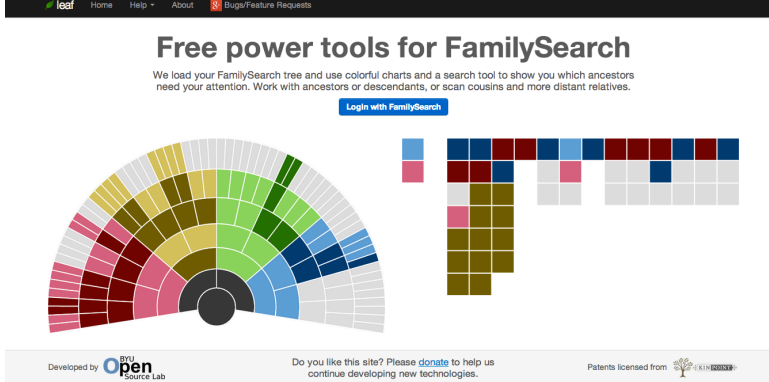

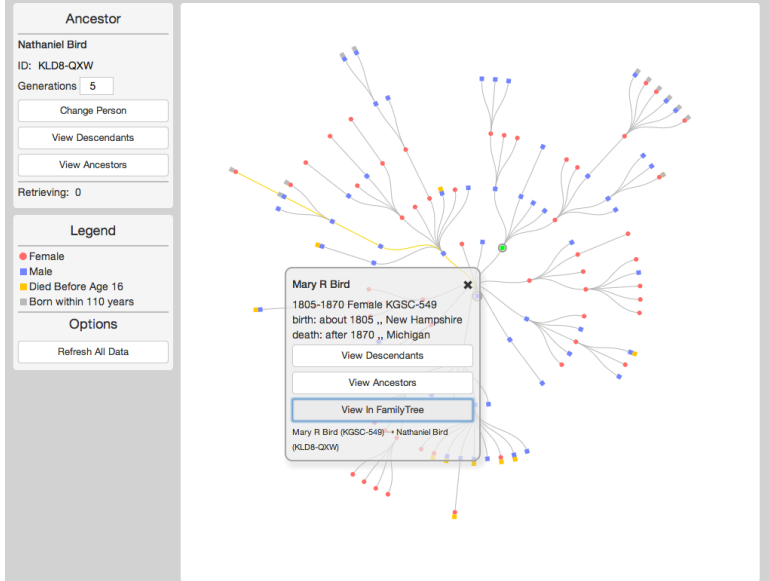

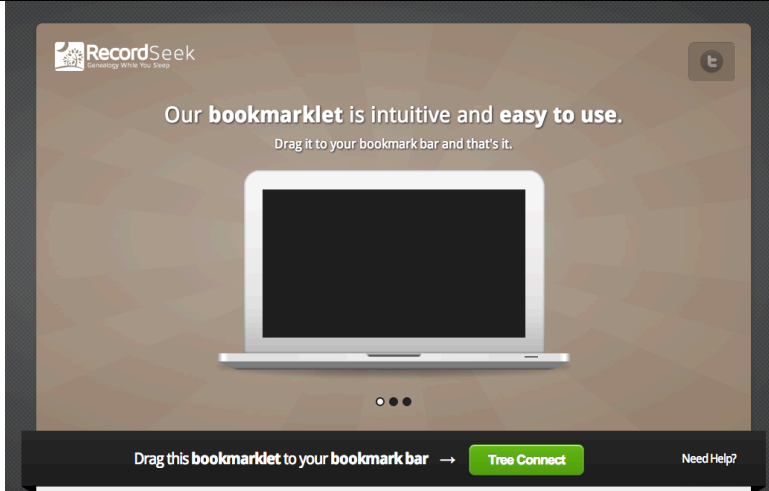

For a complete list of FamilySearch Partner products, go to [FamilySearch.org/Products](http://FamilySearch.org/Products).
